

PRODUCT TECHNOLOGY DESCRIPTIONS, NOVELTY CONTENTS

Our company manufactures retail trade natural cosmetic products under the brand names: NATURISSIMO, NATURAL SKIN CARE; produces and distributes professional natural cosmetic products under the brand names: SISSY, FIT SHAPE and FIT SHAPE WELLNESS. Our production technology for manufacturing natural cosmetic products is characterized by the following features:

- The composition development of our natural cosmetic products was done following the recommendations of Germany organization BDIH.
 - Only ingredients of living animal origin can be used.
 - Neither the final products, nor the ingredients are tested on animals.
 - No synthetic colorings, perfumes, silicones and paraffins or other mineral oil based substances are used.
 - Only benzoic acid, sorbic acid, salicylic acid or their salts and ethyl esters are used for preservation. Furthermore benzyl alcohol, ascorbic acid and its salts and natural essential oils are used for conservation.
 - No radioactive radiation is used for the reduction of microbiological germ quantity in the final products.
 - No ingredients coming from gene-manipulated plants and animals are used.
 - All bathing products (for hygienic cleansing) contain mainly environmental friendly coconut oil based betaine derivatives and glycosides as detergents which break down easily.
- During the production technology of our natural cosmetic products the standards of the German BDIH were taken into account which is generally accepted throughout Europe.
- Upon formulation of our products in order to increase effectiveness particularly such Hungarian herbs were used which are mostly suggested by professional literature. In order to maximize the effectiveness of every final product we strove to use the synergic power of herbal extracts with different effects thus creating products with uniquely complex ingredient content.
- During the manufacturing process of our natural cosmetic products the used active substances are mostly retrieved by the extraction of fresh vegetal substances. Furthermore fresh vegetal juices or pulps are used or the vegetal substances used upon production are stabilized by a gentle pasteurization method.
- In order to maximize the quick effectiveness and efficiency of the natural based active substance complex in our products high quantity herbal, vegetal, fruit extracts/pulps/juices are used.
- All our products are subject to physical and microbiological stability tests by every charge.
- During the development of all our cosmetic products professional cosmeticians test the final products considering application technology and effectiveness.

Our organic cosmetic products are launched under the brand name: BIOLA, clearly indicating such products which are manufactured for the professional cosmetic salons and spas. Our production technology is basically determined by the Hungarian rules and standards. This is regularly checked and certified by BIODERMA Hungary Nonprofit Kft.

In order to maximize the quantity of natural bioactive substances during the production of our organic cosmetic products 26 out of our 29 currently certified organic cosmetic products contain more than 95% ingredients coming from organic production. Some of our certified organic cosmetic products contain more than 50% ingredients coming from biodynamic production. All our organic cosmetic products and ingredients coming from organic production comply with regulation No. 2092/91 of the EU Council. Thus only such technologies are used during the manufacturing of our organic cosmetic products with comply with applicable standards of the EU and Biokontroll Hungária Nonprofit Kft. regarding beauty care products.

The following prohibited substances and procedures are not used during the production of our products:

- Neither the final products, nor the ingredients are tested on animals.
- Additives not mentioned in the standards are not used.
- No hydrogenated animal fats or vegetal oils are used.
- The following substances are not used during the extraction of active ingredients and in the final products: mineral oils, petroleum derivatives, benzyl, propylene glycol, butylene glycol, hexane, glycerin of animal origin
- No ionizing or electron radiation is used.
- No talcum is used.
- No synthetic perfumes and colorings are used.
- No EDTA based chelators or their salts are used.
- No substances coming from GMO organisms are used.
- No sulfonates, ethoxylated or propoxylated substances are used during production.
- No alkyl sulfates, alkyl ether-sulfates, polysorbates and ethanol amides are used as surfactants. Also no synthetic chemical sun-blocking agents or aluminum compounds are used.

The basic philosophy for the production of our products can be summarized as follows: “To extend healthy and natural face and body care using phyto- and aromatherapy and the latest scientific results of dermatology.”.

We are most pleased to have more than thousand satisfied customers using our products. We provide them with such effective face and body care products which support the healthy balance of their skin at an ad valorem price. This is done at a high satisfaction rate which is communicated to us through thankful letters and phone calls.
